

Personalized Career Counseling Report

Welcome Norman Korn,

As you embark on your journey of exploring studies, dual studies, or training, remember that learning and practical work are valuable investments in your future. Just like Norman Borlaug, who made significant advancements in agriculture through his dedication to learning and innovation, your choices today can have a positive impact on your life.

Making a good decision in your career and studies, fueled by passion and determination, can lead to fulfilling and successful outcomes. Whether you choose to further your education or dive into practical work, know that each step you take is a step towards building your future.

The following sections are intended to help you better prepare for your personal career counseling session.

Your prospects for a degree program:

1. Study Program: Computer Science

Description:

Computer Science is a study program that focuses on the theoretical foundations of information and computation. Main subjects include programming, algorithms, data structures, software engineering, and computer systems. Typical course contents involve learning various programming languages, analyzing and designing algorithms, and developing software applications.

Why it fits you:

This study program aligns well with your hobbies and favorite subjects as it involves working with computers and technology, which you seem to have an interest in. The theoretical nature of computer science also suits your preference for working theoretically rather than practically.

Career opportunities:

With a degree in Computer Science, you can pursue a variety of career opportunities such as software developer, IT consultant, data analyst, and cybersecurity specialist. One possible career path is becoming a computer systems analyst, where you would analyze computer systems and design solutions to help organizations operate more efficiently.

Additional similar study programs:

- Information Technology
- Software Engineering

2. Study Program: History and Culture Studies

Description:

History and Culture Studies is a multidisciplinary study program that explores the historical and cultural developments of societies. Main subjects include history, sociology, anthropology, art history, and cultural studies. Typical course contents involve studying various historical periods, analyzing cultural artifacts, and understanding the impact of history

on society.

Why it fits you:

This study program matches your favorite subjects in math, German, and history, as it involves in-depth study of historical events and cultural phenomena. Additionally, you mentioned enjoying spending time with friends, and studying history and culture can provide you with valuable insights into different societies and traditions.

Career opportunities:

Graduates of History and Culture Studies can pursue diverse career paths such as museum curator, historian, cultural heritage manager, or cultural policy officer. One possible career option is becoming a research analyst at a historical research institution, where you would conduct research on specific historical topics and contribute to academic publications.

Additional similar study programs:

- Archaeology
- European Studies

Your prospects for a dual study program:

1. Dual Study Program: Information Technology Management

Description:

The Information Technology Management dual study program combines business management with information technology. You will learn about topics such as database management, software development, project management, and IT security.

Why it fits:

This program is perfect for you because it merges your interest in technology with your preference for theoretical work. You will have the opportunity to work with computers and technology while also gaining a solid foundation in business management.

Career opportunities:

Upon completion of this program, you will have various career opportunities in the IT industry. You could work as an IT project manager, database administrator, or IT consultant. The demand for IT professionals is constantly growing, offering you a wide range of career prospects.

Further similar dual study programs:

1. Business Informatics
2. Computer Science

2. Dual Study Program: Teaching with a focus on Mathematics

Description:

The Teaching dual study program with a focus on Mathematics prepares you for a career as a teacher in schools. You will study subjects such as math, German, history, and educational psychology.

Why it fits:

This program aligns perfectly with your favorite school subjects of math, German, and history. You will have the opportunity to teach these subjects to students while also deepening your knowledge in educational psychology.

Career opportunities:

Upon completion of this program, you can become a teacher specializing in math at a secondary school. You could also pursue a career as a private tutor or educational consultant. With the increasing demand for qualified teachers, this program offers a stable and rewarding career path.

Further similar dual study programs:

1. Teaching with a focus on History
2. Education Management

Your prospects for a vocational training:

1. Vocational training: IT Specialist

Description:

As an IT Specialist, you will learn about various computer systems, software applications, and network technologies. Your main subjects will include programming languages, database management, and system administration. You will also learn about troubleshooting and maintaining hardware and software systems.

Why it fits you:

Given your hobbies in computers and technology, this vocational training would be a perfect match for you. You will have the opportunity to further explore your interests in this field and gain hands-on experience in working with different technologies.

Career opportunities:

Upon completing your vocational training as an IT Specialist, you can pursue a career as a systems administrator, software developer, or IT consultant. With the increasing demand for IT professionals, you will have a wide range of job opportunities available to you.

Further similar vocational training:

- Computer Science Specialist
- Network Administrator

2. Vocational training: Industrial Management Assistant

Description:

As an Industrial Management Assistant, you will learn about business operations, cost accounting, and project management. Your main subjects will include business economics, marketing, and logistics. You will also develop skills in communication, teamwork, and problem-solving.

Why it fits you:

With your favorite school subjects in math and history, this vocational training would be a great fit for you. You will have the opportunity to apply your analytical skills in managing business processes and understanding economic principles. Additionally, your preference for working theoretically will be beneficial in this role.

Career opportunities:

After completing your vocational training as an Industrial Management Assistant, you can have a career as a project manager, logistics coordinator, or business analyst. You will have the opportunity to work in various industries such as manufacturing, retail, or finance.

Further similar vocational training:

- Business Administration Assistant
- Office Manager assistant

Summary:

I have carefully considered your hobbies, favorite school subjects, and preferences in the consultation text I have created for you. I included your interest in computers and technology, as well as your love for spending time with friends. Your fondness for math, German, and history were taken into account as your favorite school subjects. The AI assistant made sure to note that you are bored by ballet and highlighted your preference for theoretical work.

I understand that despite the consultation text provided, it is important for you to discuss your career options with a career advisor. They can provide valuable insight and guidance tailored specifically to your individual goals and aspirations. Remember that this consultation text is just a starting point in exploring potential study, dual study, and apprenticeship opportunities that align with your interests and preferences.

Best regards and good luck on your further career path!

Your AI assistant.
