

Personalized Career Counseling Report

Welcome Max Mustermann,

As you embark on your journey of exploring different educational and career paths, remember that learning and practical work can open up a world of opportunities for you. Just like Max Planck, who achieved great success through his dedication to science and research, you too can make a positive impact through your studies and passion.

Making a good decision in your career and studies can have a profound impact on your life, leading to fulfillment and success. By investing in your education and gaining practical experience, you are setting yourself up for a bright future ahead.

The following sections are intended to help you better prepare for your personal career counseling session.

Your prospects for a degree program:

1. Study Program: Sports Science with a specialization in Sports Management

Sports Science with a specialization in Sports Management could be a great fit for you. Your love for basketball and interest in sports make this program ideal as it will provide you with the knowledge and skills to excel in the sports industry. With a strong foundation in math and English, you will be able to analyze data, communicate effectively, and manage sports organizations. This program will allow you to work practically in the sports field and pursue a career that aligns with your passions.

2. Study Program: Culinary Arts and Gastronomy

Considering your passion for cooking, Culinary Arts and Gastronomy could be the perfect choice for you. This program will not only enhance your culinary skills but also provide you with a comprehensive understanding of the food industry. With your background in math and English, you will be able to excel in recipe development, menu planning, and food service management. This practical program will allow you to gain hands-on experience and pursue a rewarding career in the culinary world.

3. Study Program: Computer Science with a concentration in Software Engineering

If you enjoy working with computers and have a knack for practical tasks, Computer Science with a concentration in Software Engineering might be the right fit for you. This program will allow you to combine your love for computers with your strong math and English skills to develop software solutions. You will learn how to design, implement, and test software applications, giving you the necessary tools to succeed in the tech industry. With a focus on practical skills, this program will prepare you for a successful career in software development.

Good luck in your educational journey!

Your prospects for a dual study program:

1. Dual Study Program: Sports Engineering

This program combines your love for sports and interest in computers. As a sports engineer, you will learn how to design and develop equipment used in sports, such as basketballs and sports clothing. Your practical skills in basketball and computer knowledge will be beneficial in this field.

2. Dual Study Program: Nutrition and Food Management

With your passion for cooking, this program would be a great fit for you. You will learn about nutrition and how to manage food services, which can be applied to sports teams or athletes. Your practical skills in the kitchen will be valuable in this field.

3. Dual Study Program: Business Informatics

This program aligns with your interest in computers and favorite school subjects like math and English. Business informatics focuses on using information technology to solve business problems. Your practical approach to work will be advantageous in implementing solutions for real-world business challenges.

Your prospects for a vocational training:

1. Vocational training: Sports and Fitness Business Manager

This vocational training could be a great fit for you, considering your interest in basketball and sport. As a Sports and Fitness Business Manager, you would have the opportunity to combine your passion for sport with your practical skills. This training program would allow you to work in a dynamic and active environment, where you can apply your knowledge of math and English to manage and promote sports-related businesses.

2. Vocational training: Cook

If you enjoy cooking and have a passion for culinary arts, pursuing a vocational training as a Cook could be an excellent choice for you. With this training, you would have the opportunity to work practically in a professional kitchen, honing your culinary skills and learning the ins and outs of the food industry. Your interest in cooking, combined with your practical approach to work, would make you a successful candidate for this vocational training.

3. Vocational training: IT Specialist

Considering your interest in computers and technology, pursuing a vocational training as an IT Specialist could be a rewarding opportunity for you. As an IT Specialist, you would have the chance to work practically with computers and software, applying your knowledge of math and English to solve technical problems and develop innovative solutions. This vocational training would allow you to turn your hobby and passion for technology into a successful career in a rapidly growing industry.

Summary:

I, the AI assistant, have carefully considered your interests and preferences in creating a personalized consultation text for your future studies, dual studies, and apprenticeships. I have taken into account your hobbies such as basketball, cooking, and computers, as well as your favorite school subjects including math, sport, and English. I made sure to exclude any mention of politics, as I know you find it boring.

In the consultation text, I have highlighted opportunities that allow you to work practically, combining your passion for

hands-on activities with your academic skills. This way, you can make the most of your strengths and interests in your future career path.

However, it is important to remember that this is just a starting point. I recommend discussing this consultation text with a career advisor to receive personalized guidance and explore all available options that align with your goals and aspirations.

Best regards and good luck on your further career path!

Your AI assistant.
